overview

make me dugouts supply portable football dugouts and team shelters for sports including hockey, cricket and rugby. all our portable dugouts can be customised using a range of vinyl covered cladding and corporate branded sponsorship logos, messages and panels, we can manufacture a portable sports dugouts to meet your specifications. portable dugout module details are as follows, framework can be adapted to create either square or curved frame portable dugouts:

- approx. 1950mm H x 1440mm D x 500mm per person
- 5mm thick clear PetG cladding supplied as standard, thinner cladding available on request
- welded end caps for a high quality finish – no plastic bungs
- galvanised mild steel box section frame (50mm x 50mm) – rust resistant finish*
- framework can be powder coated using standard RAL colours
- portable dugouts can be supplied with benches, moulded seats or tip-up seats
- optional extras including club logo vinyl's and padded crossbars
- orders are despatched flat packed with assembly instructions and pre-drilled framework
- on-site installation service available with most orders subject to location
- We can also supply ground anchors to fix the portable dugout to grass as well as concrete

modular system

your dugouts can expand with you...

our modular construction enables our portable square or curved sports dugouts to have modules 'added-on' or retro-fitted with module extensions at a later date meaning as you climb up the leagues your team shelter can grow with you whilst keeping the costs low.

if you're looking to for new portable dugouts on wheels or to replace your existing technical area sports dugouts, we're here to help.

choose your finish

our standard portable dugouts use 50mm x 50mm mild steel box section for the framework, we can however adapt to suit specific requirements. Our main finishes for our dugouts are as follows; galvanised only, galvanised and powder coated or brushed stainless steel. All 3 finishes have their pros & cons and associated costs.

galvanised only

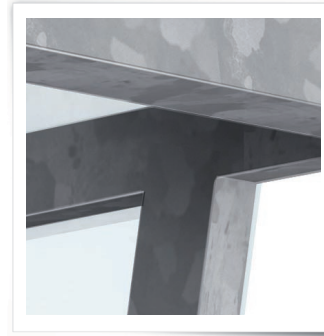

- increased corrosion protection – we prefer not to supply any dugout frame without this
- minimal maintenance required
- 10 year guarantee offered with this finish

powder coated and galvanised

- increased corrosion protection
- minimal maintenance required, easy clean finish
- 10 year guarantee offered with this finish
- large range of colours available, we can also colour match for additional cost

brushed stainless steel

- weather resistant finish
- high end finish
- rust resistant

galvanised

extremely durable finish with a corrosion resistant zinc coating to BSEN1461. High levels of impact resistance and abrasion with a 10 year corrosion warranty.

galvanised & powder coated

powder coating is applied in addition to the galvanised finish and is available in a variety of RAL colours to match your clubs colours in accordance to BS3900.

brushed stainless steel

high end weather resistant finish using 316-grade stainless steel.

choose your seating

our portable dugouts can use different styles of seats to enable different amounts of players within the dugout according to the seat centres, in general we allow for 500mm per person.

various seats have different styles and options through colour choice and personalisation options using screen printing or embroidery; we can happily create 3D visuals at the point of enquiry prior to ordering so you can see the chosen seats in-situ.

bench

12mm thick solid textured plastic bench available in various colours

moulded seats

cost effective seating solution available in a range of colours

BS premium tip-up

range of colours with various customisation options, club/ sponsor logo options

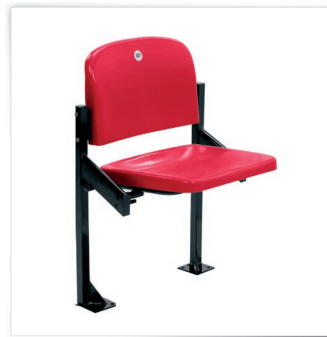

SS1 customised sports seat

high quality finish with multiple colour options and club/ sponsor logo options

individual moulded bench

moulded plastic shells available in a variety of colours

SA tip-up

available in a range of colours to suit your club branding

SC padded tip-up

padded tip-up seat, with choice of colours and club/ sponsor logo options

SS2 customised sports seat

high quality finish with multiple colour options and club/ sponsor logo options

choose your extras

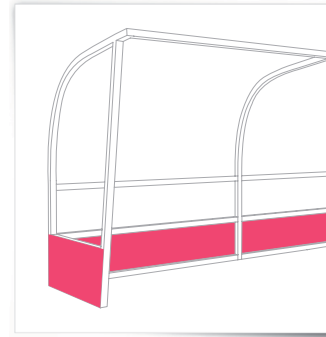

we offer a vast range of optional extras to help customise your portable sports or football dugout.

add our sponsorship panel to display your club sponsors logos and messages or HOME and AWAY vinyl's, particularly useful when applying for funding.

mild steel cladding offers additional protection to the dugouts from lower level impact, these panels are well suited for hockey dugouts due to the nature of the ball used during play.

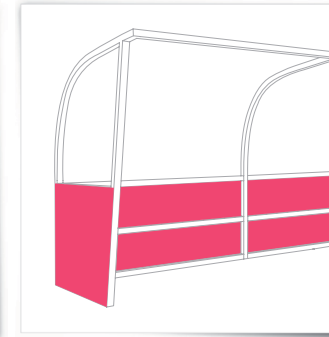

we can supply full vinyl wraps for product kit launches & stadium tour experiences Use vinyl club logos & low level vinyl panels to enhance club or sponsors branding.

our bespoke padded vinyl's fix to the portable dugout framework front crossbar and/or side uprights and are a great addition to any dugout, ideal for sponsor logos and thank you messages These can be ordered at the same time as your football dugout order or at a later date.

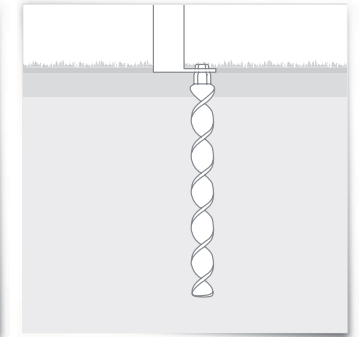

low level cladding

suitable for hockey dugouts for extra protection.

high level cladding

suitable for hockey dugouts for additional extra protection.

ground anchors

securely fixes the dugout to grass surfaces.

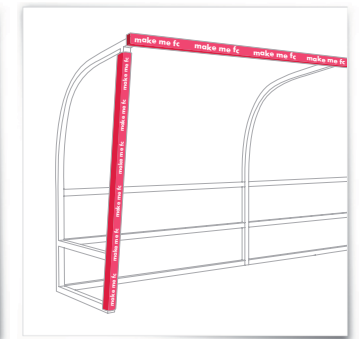

sponsor panel

an additional steel panel secures along the front of the dugout for vinyls and messages.

vinyls

club logos, sponsorship logos or anything you can think of, all applied prior to delivery.

padded vinyls

great for club and sponsor logos and protects the frame edges and players heads from knocks!

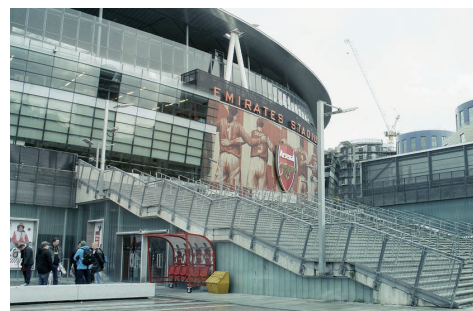

arsenal fc

we initially manufactured dugouts for Arsenal FC through a brand agency event for their 125th anniversary kit launch.

we manufactured a pair of 6 seater portable dugouts with full vinyl wraps across the curved cladding. the seats were frame mounted tip-up seats the same seats as used in the Emirates new stadium build.

in addition to the brand event portable dugouts, we have also manufactured an additional set of 6 No. 6 seater portable dugouts for Arsenal FC training ground in E17.

the curved frame portable dugouts were supplied in a RAL powder coated finish to suit the clubs branding and with full swivel castors to make them easier to move.

sony experia

we were contacted by a marketing agency to supply a portable football dugout that could be wheeled into position at different events for Sony with their new Experia handset, the first being at the Carphone Warehouse head office in Ealing, London.

the event was linked to the start of the World Cup, we were given just 4 days to get the dugout manufactured and delivered (it was a bank holiday week too)!

we utilised our curved frame portable dugout module design and adapted it to suit the power feed and manufactured a 'support arm' feature. the dugout then had vinyls applied to help enhance the Sony brand, the client was very impressed with the speed and quality of the end product.

manchester university

we were contacted by Manchester University facilities divisions to supply dugouts for their Astro pitch.

we used our standard curved frame modules to create 2 No 8 seater portable dugouts with locking full swivel castors. the dugouts also had the university crest logo applied to the rear PetG cladding.

we utilised our purple moulded seats for the order which were a very good match to the University colours and helped enhance their brand.
